

Traditional Approach to New A Levels Spells Success at Denbigh

Students are celebrating excellent A level results at Denbigh School, yet again. There were some outstanding individual performances, with the top 10 students securing the equivalent of 4 A*/A grades each. The status of Denbigh's Maths Hub and its success as a Science Learning Lead School are paying dividends, with students securing places at top institutions in STEM subjects.

Denbigh School Headteacher, Andy Squires, said:

"We have maintained a traditional approach with AS courses supporting the very highest achievement at A Level, in an environment where AS courses are no longer favoured. I am immensely proud of what our students have achieved in their Year 13 examinations. This is a result of their drive and determination over the last two years. Students, staff and parents, rightly, have high aspirations; in an increasingly competitive environment, I am delighted that our students have secured top university places, apprenticeships and employment opportunities within their chosen fields.

"This year we have students studying Medicine at Cambridge, Maths at Durham and UCL, Mechanical Engineering at Bristol, Computer Science at Warwick, Chemical Engineering at Birmingham, Aerospace Engineering at Nottingham, Law at York, History at UCL and Biomedical Science at Imperial College.

"We wish all our students well in their further studies."
