

Year 9 students take on the Sustainable Futures Virtual Escape Room Challenge

It was brilliant to see our Year 9 DT students joining 5000 students from across the country in the Sustainable Futures Virtual Escape Room Challenge. Students had to answer questions on sustainability in order to find clues to escape the room within a 30-minute window. Our students showed a good level of knowledge when answering questions on sustainability and have learnt even more to feedback into their studies. This was a really fun and innovative event for everyone involved!
